

## CTC NET DOMAIN HOSTING

A good domain name is your Internet identity. Base it on your business name, product name or type of business you're in. If your business name is hard to spell, come up with something easy to remember and spell. To avoid trademark infringement threats, DO NOT use a trademarked name in your domain, unless you OWN the trademark.

The cost to set up a domain is \$85. (\$35. billed to your credit card from the registration company and \$50. billed to your Chibardun Internet account). The monthly hosting charge for the domain is \$15. This includes 200MB of web space, email@yourdomain, unlimited email aliases, CGI bin, Web Stats, unlimited FTP access, unlimited web traffic, your choice of hit counters, and a listing on our local pages.

To proceed, please complete the Domain application form below and return to us. (Payment for the \$35.00 must be made in advance via credit card – **do not e-mail** this information) Allow one week for completion.

**A NOTE ABOUT SEARCH ENGINES:**

Search engines allow potential visitors to find your web site. You DO NOT exist on the Internet until you begin the process of getting listed in some of the thousands of search engines worldwide. All search engines have common components. Each includes different web pages in its database. Because of the growth of the Internet, and the backlog of submissions to search engines, expect a listing in major search engine to take up to 4 months or more. Getting listed in major search engines should be a priority of your business. The best search engines only have about 15% of all the web sites listed in them. When you visit a search engine, do a search for your web site. If it's not listed then spend a few minutes and submit it. Most search engines have "Add Your URL" or "Add Your Site" type of link at the very bottom of their page.
